“WE’VE GOT YOU COVERED”

Our Great Lakes Premium Coloured Mulches bring an exciting new aesthetic dimension to any garden or landscape project. Our Premium mulches are made from recycled clean wood mixture, which is hand sorted, double ground and screened to ensure product consistency and superior water absorption. Our mulches are coloured with iron-oxide water based dyes in a variety of colours which are naturally environmentally friendly and safe for pets and children. These dyes have superior colour holding capacity which ensures your colour stays in your garden.

An added advantage to our Great Lakes Premium Mulches is our Time Flow H₂O conditioning made from plant derived ingredients that is added directly to the dye mixture adding the increased value of moisture retention which is more beneficial than regular dyed mulch. Time Flow H₂O locks moisture into the mulch after a rain or watering, releasing it slowly when the soil and plants need it most. This helps to reduce watering and effort to maintain your garden.

Great Lakes Premium Mulches offer a decorative and beneficial advantage to any landscape project. While providing an aesthetically pleasing ground cover that enhances plant and tree growth, it also helps to eliminate weeds and adds nutrients to your soil as the mulch breaks down and decomposes. Our Great Lakes Premium Mulches are the **ONLY** screened mulches in Ontario with the Time Flow H₂O Water advantage. Our production system offers the **ONLY PREMIUM Mulches** in Ontario.

Great Lakes Premium Black™

Our Great Lakes Premium Black is coloured with a rich black colorant that holds a consistent colour longer with the use of durable, high quality ingredients that provide superior coverage to every piece. This product is our number one seller and is suitable for the enhancement of any garden, park or landscaped setting. With the Time Flow H₂O advantage, this product is a superior to any other mulch on the market.

Great Lakes Premium Brown™

Our Great Lakes Premium Brown is coloured with a rich earth tone colorant that holds a consistent colour longer with the use of durable, high quality ingredients that provide superior coverage. This product, quickly growing in popularity, is aesthetically pleasing in any setting with a more natural colour. The Time Flow H₂O advantage adds additional value making our product a premium mulch.

Great Lakes Premium Red™

Our Great Lakes Premium Red is coloured with a deep and luscious red colorant that holds a consistent colour longer with the use of durable, high quality ingredients that provide superior coverage. This product creates a beautiful contrast against any greenery and shrub landscape setting. With Time Flow H₂O, you know this product will continue to provide superior water hydration to your garden.

Great Lakes Premium Gold™

Our Great Lakes Premium Gold is coloured with a natural colorant that continues to hold consistent colouring and provides a natural look in any setting. The Time Flow H₂O advantage adds additional value to your products longevity and function.

Great Lakes Premium Pine™

Our Premium Pine Mulch is single ground and made from a mix of natural red and white pine barks. It is medium brown in color with a pleasant pine aroma. As pine mulch begins to decompose it adds rich nutrients to the soil.

Great Lakes Premium Pine – Merlot available Spring 2015.

Great Lakes Premium Cedar™

Our Great Lakes Premium Cedar Mulch is single ground and made with natural white cedar bark from eastern Ontario. It is golden in color with a rich aroma that provides moisture retention and weed control.

Great Lakes Premium Merlot™

OUR NEW MULCH FOR SPRING 2015

Our Great Lakes Premium Merlot is the NEW Red. This rich merlot (cross between red and brown) offers richness in colour that is new and exciting. This product has the Time Flow H₂O advantage offering a superior mulch with super water absorption. Coloured with the same family of durable, high quality ingredients this mulch provides superior coverage and beautifies all settings.

Our Great Lakes Premium Mulch is the **ONLY** one with the TimeFlow H₂O[®] Advantage

TimeFlow H₂O takes the natural water retention quality of wood mulch to an even higher level.

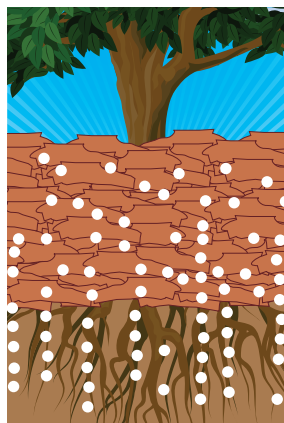

TimeFlow H₂O technology locks in moisture after a rain or watering and releases it when the soil is dry. By releasing water at a slower rate, it is distributed evenly to roots – eliminating dry spots. Due to the fact that **TimeFlow H₂O** reduces the watering volume and frequency needed for healthy plants, it saves homeowners time, labour and water costs.

TimeFlow H₂O is made from plant-derived ingredients and is ideal for any wood fiber mulch.

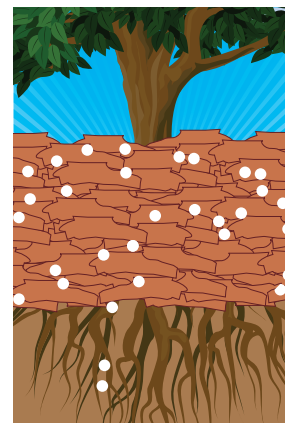

Water penetrates and is then stored in the mulch

Water is released when needed, to the plants that need it most

Plants require less watering, saving time for homeowners
